

Oil Stabiliser (NOS)

Nulon Oil Stabiliser is a unique formulation of anti-wear additives, viscosity booster, detergent and dispersants designed to reduce engine wear, improve oil viscosity and minimise sludge build-up.

All types of engines, old and new, or high performance, can benefit from the additional protection offered by Nulon Oil Stabiliser.

Nulon Oil Stabiliser improves the wear protection within any engine. It dramatically boosts the levels of anti-wear zinc additives, maintains viscosity under extreme heat and load and because it clings to metal surfaces more effectively it helps reduce wear on start-up. This 100% petroleum based product can be added to any oil brand, mineral or full synthetic to boost the oil's performance levels.

Benefits

- Increases viscosity and oil pressure
- Improves engine compression and reduces oil consumption
- Reduces oil leaks and exhaust smoke
- Compatible with all types and viscosity engine oil grades
- Suitable to use with all engine types

Directions for Use

DIRECTIONS FOR USE:

Treatment rate 1L per 4-5L.

Drain engine oil and change filter as per owner's manual. Add 1L of Nulon Oil Stabiliser to engine and then fill to recommended capacity with new engine oil.

First Aid

KEEP OUT OF REACH OF CHILDREN.

FIRST AID INSTRUCTIONS: For advice, contact a Poisons Information Centre (Phone e.g. Australia 131 126; New Zealand 0800 764 766) or a doctor (at once). If swallowed, do NOT induce vomiting. If in eyes, hold eyelids apart and flush the eye continuously with running water. If skin contact occurs, flush with running water.

Pack Sizes

Part No: NOS-1
1 Litre - 6 Per Carton
Barcode: 9311090006188
