

Stop Smoke (SS)

Nulon Engine Stop Smoke uses hi-tech, long-chain polymer technology to stop blue exhaust smoke. When an engine uses oil or blows blue smoke constantly, it indicates excessive piston and ring wear. This extra thick formula stops oil leaking past piston rings and valve guides, reducing oil burning and exhaust smoke. Ideal for all petrol, diesel and LPG engines that blow blue exhaust smoke due to oil burning.

Benefits

- Reduces exhaust smoke
- Reduces oil loss & oil burning
- Reduces spark plug fouling
- Boosts oil pressure
- Boosts cylinder compression
- Quietens engine noise

Directions For Use

Add contents to engine oil when engine is at normal operating temperature. Can be added at any time or use each oil change. For 4 cylinder engines, use ½ bottle. For 6 and 8 cylinder engines, use full bottle.

NOTE: If exhaust smoke continues after treatment, it indicates excessive engine wear or previous engine damage has occurred. Seek mechanical advice.

TIP: To reduce blue smoke at start-up or when decelerating, use Nulon Engine Stop Leak.

WARNING: Do not exceed 10% treatment level in sump oil, i.e. for 4 litre sump capacity use maximum 400 ml of product.

First Aid Instructions

For advice, contact a Poisons Information Centre (Phone e.g. Australia 131 126; New Zealand 0800 764 766) or a doctor (at once).

Pack Sizes

Part No: SS

500 ml - 6 Per Carton
